

### **16 degree of Sagittarius: 'Sea gulls watching a ship'**

Sea gulls are creatures who, like men, often explore deviant ways to survive. These birds' keen intelligence has allowed them to adapt to a constantly changing world (the ocean and sea shore); following fishing trawlers, ocean cruisers, beach goers, wherever the detritus of human wastefulness can be found.

Applying one's intent to the task at hand. Watching out for opportunities, focused on the goal so to be ready when the right time comes. Good timing, resourcefulness.
